Wall Wonders

These concrete tiles by Benitu are crafted from recycled materials and are available in three forms: the "San", "Wave" and "Six" tiles. A striking wall feature on their own or arranged in a cluster, these mind-bending geometric tiles are sure to catch the eye of passersby.

Materiality

The Innate collection is a collaboration between Jon Goulder and Fiona Lyda, conceived with an emphasis on uniquely Australian materials, textures and design sensibilities. The Night range is no exception, featuring black leather, brass, dark stone and wood treated by "pickling" – a process of applying vinegar darkened by steeped steel wool.
